CD OPERATION ALERT

PLANNED JULY 20-26 ON NATIONWIDE SCALE

Civil defense organizations on the local and county level will have a major role to play in the civil defense training exercise, "Operation Alert 1956," which will be conducted July 20-26.

The training exercise, developed by the Federal Civil Defense Administration, the Department of Defense and the Office of Defense Mobilization, will simulate a single massive attack with nuclear weapons directed against military, industrial, and populated targets in the United States, Alaska, Hawaii, Puerto Rico and the Canal Zone.

A total of 76 areas will be the pre-selected presumed targets and each of the areas may include a number of cities or small communities. All of the nation's other target areas have been assigned support roles in the exercise.

In addition areas of up to 10,000 square miles downwind from the attack cities, including rural communities, lie within the fall-out pattern of the bomb blasts and thus will be assumed to be in danger of radiological contamination.

This will give every local civil defense organization in the nation an opportunity to play a direct role in Operation Alert. The extent to which they do participate, and whether or not evacuation and shelter drills or other public participation features are to be scheduled will be determined by local civil defense authorities.

The first 36 hours of the exercise from 10 a. m. (EST), July 20, through 10 p. m. (EST), July 21, will be devoted almost entirely to the immediate problems, decisions, and actions required at local and State control centers. Problems involved include the assessment of the local effects of the assumed attack, and the local counter measures which would be taken to protect the population.

Local levels may also after completing this phase of the operation. However the exercise will continue for an additional five days with successive phases to cover State and Federal levels. All levels of civil defense will be activated at the start of the exercise and there will be major problems which will be handled at all levels.

Every civil defense organization has a place in the exercise, since nuclear bombing would affect all citizens. Areas omitted from the target area will have vital "good neighbor" functions to perform just as would any city that escaped bombing in a real attack.

Civil defense control centers everywhere will go into operation with the assumed bombing of the first alert on July 20. From that point, they will carry on just as if a real attack had been made on the United States. The civil defense exercise will be a realistic and complete as a practice naval or military maneuver.

Civil defense warrens and volunteer will direct evacuation and shelter drills, simulate rescue operations and gather data on death, destruction and radiological hazards. This information will be reported to the control centers by radio-teletype radio or by other methods. Command decisions will be made and information will be relayed to State, regional and national civil defense headquarters.

Mrs. Charles Hamilton, Jeff and family of Falmouth, Maine were in town Wednesday and Thursday this week.

happy vacations begin in a Chevy

You'll love to travel in it, because it loves to travel! When you get this Chevrolet out on the road, you'll want to keep going—and so will the whole family.

America's largest selling car—
2 million more owners than any other make.

Of course, even in a Chevrolet the happiest vacations may involve one or two minor problems. Like fidgety small fry who want gallons of water and keep asking if you're almost there. The big things, though, are beautifully taken care of by this roomy Chevrolet's smooth and easy way of going. That's for sure.

The fact is, few cars at any price hold the road with Chevy's grace, with its solid feeling of stability. And with horsepower up to 235, Chevrolet moves out like a whiplash, for safer passing. It's no wonder that so many people who used to buy higher priced cars are changing to Chevrolet! Stop by soon for a ride.

Conservation Farming
in Oxford County

by Douglas L. Morrison
Soil Conservation Service

Landowners in this area who are interested in tree planting this fall should contact the Oxford County Soil Conservation District office in South Paris as soon as possible. Trees are scarce now and orders are being sent to the State Nursery most every week.

The Town of Oxford plans to set out about 10 acres on the Old Town Farm. This was set aside as a Town Forest several years ago. The Town of Brownfield is also planning to set out several acres to trees this fall. They have some tax delinquent land that was burned over in the fire of 1947 and is worthless in its present condition.

Edward Oman of Norway has already ordered 4,000 trees for planting next spring.

As most of you now know the Oxford County Conservation District now has two tree planting machines available for use to co-operators. These machines make tree planting a simple and inexpensive project.

There are very few acres that do not have some economic value if put to the use to which it is best suited. Anyone having problems in land use or improvement should contact the Soil Conservation Office in South Paris.

CONELRAD CAR RADIO dial marked at 440 and 1240 kilocycles for any emergency will come in handy when all radio stations go off the air at 3:10 p.m. on July 20, and then some return to broadcast special civil defense material on these frequencies as part of Operation Alert, 1956. The 15-minute nationwide Conelrad test,

first of its kind, will test radio stations' ability to switch to the Conelrad system of broadcasting in an actual attack so that emergency instructions could be radioed to the public without guiding enemy bombers to their targets. Civil defense authorities are hoping the public will mark their radios for future emergencies. (FCCA Photo)

"I REMEMBER"

From Mrs. Arthur C. Wells, Bethel, Vermont: Did your grandfather give you old-fashioned Maine drops when you had finished your evening meal? I remember as a small girl I was required to eat a "drop" after every meal. My father would get sick and the drops would cure him. It was hard work for me, a lightening, unpalatable pill but at the end there was a kindly grandfather with his bag of Maine drops.

And in the late afternoon of those hot summer days, Grandfather fed the cows. "Gee, gee," she would call and across the meadow she would come, wagging and nodding, to the barn.

The duck used to wander far from home, foraging. One time a hidden stream surprised them on the other side of the river. Grandmother called and they swam across the water and came home.

Watching-plucking time came in late August. Grandfather and the boys were taken one at a time into the back door, and a pillow was placed over their eyes. The boys would hold the game while Grandfather plucked it.
